DAY LILIES

Every year new varieties are added to the already long lists of beautiful day-lilies. Gradually the fine new varieties are winning the recognition they richly deserve. Gardeners will be well repaid by adding to their collections some of the outstandingly good varieties now available.

Varieties and Season of Blooming

To get the greatest enjoyment out of daylilies one should choose varieties to range from light shades of cream and yellow through deep yellow and orange to the rich tawny and red tones. To aid you in obtaining the best, we endeavor to offer only those that have good growing and blooming characters in addition to high flower quality. The time of blooming varies somewhat from year to year but one can roughly classify the varieties into four groups: viz, early, early mid-season, mid-season, and late. In the vicinity of Washington, D. C., varieties marked "e" (early) bloom within the period of May 2-31; those marked "em" (early mid-season) June 1-30; those indicated by "m" (mid-season) July 1-20; and those marked "l" (late) July 20 until frost.

Instructions for Ordering and Planting

We take pride in supplying strong plants of superior varieties at a reasonable price. We do not sell un-named seedlings. Our stock is guaranteed true to name. If a mistake should occur adjustment will be promptly made. Postage will be paid on all orders of \$2.00 or more. Transplanting may be done in spring or in mid-summer after blooming is over. Late fall planting is not advised where the weather is cold enough for winter injury to be a problem. Daylilies grow best when planted in a fertile soil.

New Varieties

The introductions of Dr. H. P. Traub, a noted breeder of daylilies, are increasing in popularity every year. Such varieties as MAYOR STARZYNSKI and LIDICE are fine for their garden effect, while MILDRED ORPET, GEO. KELSO, CARNIVAL, and DUCHESS OF WINDSOR add color harmony in the garden with their lighter shades. His DR. STOUT variety combines shapeliness of flower form and a pleasing orange color with a reddish tint. It should be in every collection. The very superior new red variety BERWYN has received many favorable comments while growing on our grounds. Its price has been reduced to \$3. We are hoping to be able to supply the increased demand at that attractive price. ADVENTURE, a fine new yellow, is also very popular on our grounds.

THE HISTORY OF THE UNITED STATES

The history of the United States is a story of growth and change. From the first settlers to the present day, the nation has evolved through various stages of development. The early years were marked by exploration and settlement, followed by a period of rapid expansion and industrialization. The American Revolution and the Civil War were pivotal moments in the nation's history, shaping its identity and values. The 20th century brought significant social and political changes, including the rise of the American Dream and the challenges of the Cold War. Today, the United States continues to evolve, facing new challenges and opportunities in the global landscape.

The early years of the United States were characterized by exploration and settlement. The first European settlers arrived in the late 15th century, followed by a wave of immigration in the 17th century. The colonies grew and developed, leading to the American Revolution in 1776. The new nation faced numerous challenges, including the struggle for independence and the establishment of a federal government. The Civil War (1861-1865) was a pivotal moment in the nation's history, resolving the issue of slavery and preserving the Union. The Reconstruction period (1865-1877) followed, leading to the passage of the Reconstruction Acts and the 14th and 15th Amendments. The 19th century was a period of rapid expansion and industrialization, leading to the rise of the American Dream. The 20th century brought significant social and political changes, including the rise of the American Dream and the challenges of the Cold War. Today, the United States continues to evolve, facing new challenges and opportunities in the global landscape.
